'MY LIST'

This is a temporary folder useful for printing, editing, and generating bibliographies.

1. Open a folder to locate references that you want to add to 'My List'.

2. For each reference you want to include, click on the star star which moves the record to My List.

   As you do this, the green plus on each star will become a red minus . Click on it again to remove the record from My List.

3. When you've finished adding references (from one or more folders), click on the My List icon on the right side of the page under Folders.

   From here you can print or create a bibliography with you're My List References. This list is only temporary and disappears when you log out of RefWorks. (The references however, will remain in their original folder locations.)
